

Love in Action Ethiopia has done an outreach activity and was able to reach out to 100 children at the beginning of the pandemic at the capital city, Addis Ababa, where the highest number of street children are found in Ethiopia, provided them with new clothes and provided them with food with its feeding program. In Addition, as part of its COVID-19 response, Love in Action Ethiopia placed billboard/ posters and hand washing facility with soap and water, in the slum areas of the capital where high number of street children live, as part of awareness-raising and risk-communications in order to ensure that people know the dangers of the disease. It should be noted that a holistic approach is needed during the corona virus pandemic in order to protect the street children and that will be possible with your support. **Donate to the “Help street children”**
